15 | 5 | Never give up on your dreams

and finally concluded "we can't run k8s, use EKS

Wednesday, June 26th

paigeadele 5:25 PM
dude so many people are doing it wrong
like Ive found shit loads of eks clusters
exposing 169.254.169.254

<neoice> APP 5:26 PM
KEK
that's one of my favorite scans

paigeadele 5:26 PM
3proxy

<neoice> APP 5:26 PM
I shared it with some blackhat friend of mine and he's found cool shit with it
I should leave, no one's here anymore
boss on vacation lol

paigeadele 5:27 PM
yeah man catch you later
if you're around l8r tonight pingthe chats
I think I just figured out my kubic error

<neoice> APP 5:29 PM
I'm always around
I'm gonna go snuggle my bong and sit on discord for like 4hrs
maybe do a line of k

paigeadele 5:29 PM
yeah me too now that I've got slack bridged its much better this way

```
kubeadm init --ignore-preflight-errors=IsPrivilegedUser
I0627 02:33:39.629134   13505 version.go:240] remote version is much newer: v1.15.0; falling back to: stable-1.14
[init] Using Kubernetes version: v1.14.3
[preflight] Running pre-flight checks
        [WARNING IsPrivilegedUser]: user is not running as root
        [WARNING Firewalld]: firewalld is active, please ensure ports [6443 10250] are open or your cluster may not function correctly
        [WARNING Service-Docker]: docker service is not enabled, please run 'systemctl enable docker.service'
        [WARNING IsDockerSystemdCheck]: detected "cgroupfs" as the Docker cgroup driver. The recommended driver is "systemd". Please follow the guide at https://kubernetes.io/docs/setup/cri/
        [WARNING FileExisting-ebtables]: ebtables not found in system path
        [WARNING FileExisting-ethtool]: ethtool not found in system path
        [WARNING FileExisting-tc]: tc not found in system path
[preflight] The system verification failed. Printing the output from the verification:
KERNEL_VERSION: 5.1.7-1-default
CONFIG_NAMESPACES: enabled
```

Admitted_____

[2019-06-27 00:24:49] <paigeadele> my computers running real slow because I'm archiving a shit load of data but
[2019-06-27 00:25:00] [<Slack API Tester> bot] it's a pain in the ass
[2019-06-27 00:25:05] [<Slack API Tester> bot] but seriously, we had a team working on it
[2019-06-27 00:25:08] [<Slack API Tester> bot] for like 9+ months
[2019-06-27 00:25:12] <paigeadele> thats the thing about kubernetes thats always been a "why am I doing this again"
[2019-06-27 00:25:16] [<Slack API Tester> bot] and finally concluded "we can't run k8s, use EKS"
[2019-06-27 00:25:39] <paigeadele> dude so many people are doing it wrong
[2019-06-27 00:25:49] <paigeadele> like Ive found shit loads of eks clusters
[2019-06-27 00:25:57] <paigeadele> exposing 169.254.169.254
[2019-06-27 00:26:01] [<Slack API Tester> bot] KEK
[2019-06-27 00:26:07] [<Slack API Tester> bot] that's one of my favorite scans

Wednesday, June 26th

paigeadele 8:11 PM
lots of fucking work to do

paigeadele 8:42 PM
Sigh..
For some reason i lost a whole fleet of miners all at the same time, so i think someone is onto me and they're using pool traffic info or something to correlate the account / miner ips
So im gonna have to start using other wallet addresses
No surprise
Plenty of people don't want me to succeed at anything let alone this and ive been way too liberal with information
I need to go through my hosts and harden stuff theres something somewhere someone
And plenty of other opportunities that i can cold start that are far removed from anything that anybody is onto me for
So. Whatever. Heh

<suckysucky> APP 8:52 PM
jerkcity has quit the IRC channel

<neoice> APP 8:53 PM
haha, I crashed Comic Chat joining here

<suckysucky> APP 8:53 PM
jerkcity has quit the IRC channel

paigeadele 8:53 PM
Nice

<neoice> APP 8:53 PM
and again
shitty

paigeadele 8:53 PM
Hmm
Oh

<neoice> APP 8:53 PM
works on EFnet still

paigeadele 8:53 PM
Znc
Set charset
Not utf8

<neoice> APP 8:53 PM
lo
comic chat
has no settings
I could barely figure out how to specify host

paigeadele 8:54 PM
Connect to the NC and set the connection settings tonight UTF-8
Znc
Disable your Tips UTF-8

<neoice> APP 8:54 PM
also my space bar doesn't work in WINE lol

paigeadele 8:55 PM
Dude that's fucked up

<neoice> APP 8:55 PM

Thursday, June 27th

<erratic> APP 9:57 AM
to notify grafana?

Bronek 9:58 AM
Neoice - perhaps they spend all day going to meetings.
Like me yesterday :-(

<erratic> APP 9:58 AM
that sounds like amazon

Bronek 9:58 AM
Not amazon, luckily

<neoice> APP 9:59 AM
notify{} is just a printf() basically lol
and the AST could technically put it anywhere
because it interprets variables procedurally, it's going to wind up doing what you want
but that's a side-effect, not a feature.

<erratic> APP 10:00 AM
@neoice: https://termbin.com/6v7c
msu = michigan state uni
vodafone == vodafone

<neoice> APP 10:00 AM
ohio-crash\

<erratic> APP 10:00 AM
ISRM-WAF-Webrole == capitol one

<neoice> APP 10:00 AM
go spelunking on govcloud lol

<erratic> APP 10:00 AM
ohio crash == ohio.gov dept of transportation

<neoice> APP 10:01 AM
oof

<erratic> APP 10:01 AM
yeah....

<neoice> APP 10:01 AM
sketchy shit
don't go to jail plz

<erratic> APP 10:01 AM
wa wa wa wa, wa wa wa wa wa wa wawaaaaaaaaaaaa
Im like > ipredator > tor > s3 on all this shit ..
I wanna get it off my server thats why Im archiving all of it lol
its all encrypted
I just dont want it around though
I gotta find somewhere to store it
that infobloxcto one is interesting
they have > 500 docker containers
copied
need to archive those
weird shit though all written in go
like they make shitty stuff imho

<neoice> APP 10:04 AM

Friday, June 28th

none of us want to deal with OPM interviews and shit

paigeadele 4:42 PM
Dude they polygraph you

<neoice> APP 4:42 PM
it sounds like most cloud providers are trying really hard to secure stuff in such a way that you don't *need* to be super classified

like Azure's Gov controls sound dope

basically all the stuff Microsoft is doing in the auth/ID management space for businesses but 10x because it's MS Internal and they can actually do it.

paigeadele 4:43 PM
You shouldnt have classified info if you dont know how to encrypt data and handle it

<neoice> APP 4:43 PM
exactly

paigeadele 4:43 PM
Is the bottom line

<neoice> APP 4:43 PM
we're talking about how to implement customer-controlled keys as a prereq for classified and beyond

we don't even want the ability to decrypt shit.

on accident

paigeadele 4:44 PM
Like thats always gonna be the thing is can you ensure it without having to rely on another party to do it for you

Having the software to do it is one thing

I donno

Some people disagree but

In places where classification and encryption is just a formality then sure i guess

But it begs the question is it worth it at all

<neoice> APP 4:46 PM
I mean, if you're a multi-tenant provider, you pretty much have to at least encrypt to avoid leaking between tenants

paigeadele 4:47 PM
Yeah thats true

Its weird what the world has come to and yet despite how important security is for some i can still login into so much with admin/admin

And just trivial inexcusable shit

<neoice> APP 4:50 PM

Monday, July 8th

```
/dev/vda1 on / type ext4 (rw,relatime,block_validity,delalloc,barrier,user_xattr,acl)
root@ubuntu:/home/ubuntu# debugfs -R features /dev/disk/by-label/cloudimg-rootfs
debugfs 1.42.13 (17-May-2015)
Filesystem features: ext_attr resize_inode dir_index filetype extent flex_bg sparse_super large_file huge_file uninit_bg dir_nlink extra_isize
root@ubuntu:/home/ubuntu#
```

I'm not real familiar with how the journal works but does the journaling that was on still reside somewhere on disk or has it been deleted when it was disabled

also just checked on another vm that still has journaling enabled if theres a flag and there is

```
ubuntu@ip-172-31-7-32:~$ sudo debugfs -R features /dev/disk/by-label/cloudimg-rootfs
debugfs 1.44.1 (24-Mar-2018)
Filesystem features: has_journal ext_attr resize_inode dir_index filetype needs_recovery extent 64bit flex_bg sparse_super large_file huge_file dir_nlink extra_isize metadata_csum
```

so I guess its safe to assume it is actually disabled but afaik and last time I checked disabled doesn't necessarily mean deleted

one more thing can I remount it ro again

yeah evidently you can

still @neoice tell me how filesystem journaling works on ext4

paigeadele 11:24 PM
well this is cool

asides from that one exception Ive got a pretty comprehensive CYA routine

paigeadele 11:32 PM

```
debugfs:  root@ubuntu:/homdebugfs /dev/disk/by-label/cloudimg-rootfs
debugfs 1.42.13 (17-May-2015)
debugfs:  logdump /tmp/image
logdump: Read-only file system while opening /tmp/image for logdump
debugfs:  logdump /dev/shm/image
logdump: filesystem has no journal
debugfs:
```

Tuesday, July 9th

paigeadele 12:06 AM
this virus is looking pritty good https://termbin.com/I7u6

I think I'm gonna call it quits

yep, works

---- 2019-07-09 ----

[2019-07-09 00:06:55] <paigeadele> this virus is looking pritty good <https://termbin.com/l7u6>

[2019-07-09 00:07:02] <paigeadele> I think I'm gonna call it quits

[2019-07-09 00:11:42] <paigeadele> yep, works

[2019-07-09 00:18:36] <paigeadele> <https://gist.github.com/paigeadelethompson/4555c7de22cc4e6749ad90ef976a54f9> jillianlenox you know that script I was talking about yesterday? the one that I needed to fix but had been putting off and didn't really wanna?

[2019-07-09 00:19:53] <paigeadele> necessity is pretty loosely defined

[2019-07-09 00:22:12] <paigeadele> ```

Do the needful: To do that which is necessary or required, with the respectful implication that the other party is trusted to understand what needs doing without being given detailed instruction.```

[2019-07-09 00:27:49] <paigeadele> ah yeah I was gonna make $repos / sources.list a region aware script right now it just uses the apt mirrors in us-east-1 but I have code in some of the embedded scripts which is region agnostic

[2019-07-09 00:28:25] <paigeadele> like the miner pool servers, are regional so it makes since to use the ones closet to your TZ

[2019-07-09 00:29:15] <paigeadele> I just never bothered for the dpkg servers though, but I started thinking about it and Im wondering if perhaps hitting those cross region is tipping somebody off

[2019-07-09 00:30:12] <paigeadele> if there is some kind of metric somewhere for cross region dpkg mirror usage on some dashboard that somebody looks at .. I mean that seems like a real possibility to me

[2019-07-09 00:31:37] <paigeadele> its a thing that isn't necesarrily a problem and doesn't need to become one if they have apt mirrors that are regional then they should be used accordingly and it probably sticks out like a sore thumb if it is measured I doubt too many people do it except by accident?

[2019-07-09 00:34:52] <paigeadele> the other thing is Iknow that someone in one of the regions managed to figure out how to look at the ip addresses for pool traffic I think because 20 nodes got taken out in the same instant and I know that they must've gotten the ips in order to find all of the different accounts, 1 of which was delayed which means a ticket for each region that they were end was opened, and one of the tickets wasn't responded to as quickly as the others (probably heathrow and eu-west-1)

[2019-07-09 00:35:03] <paigeadele> not 100% on that but I'm pretty sure those guys are on top of shit

[2019-07-09 00:35:37] <paigeadele> whereas the ohio regon, they are not on top of shit because its a very new region and ITS FUCKING OHIO

[2019-07-09 00:36:15] <paigeadele> you know the state that supposedly the movie gummo the story took place in?

U.S. v. Paige Thompson
CR19-159 RSL
Plaintiff's Exhibit No. 417
Admitted_____

[2019-07-09 00:36:24] <paigeadele> yeah that place

[2019-07-09 00:37:41] <paigeadele> gummo == real life documentary

[2019-07-09 00:40:43] <paigeadele> but anyway, the point is, the way they were finding all of the IPs so quickly is by looking at the blocks I guess? they all had the same account id but now that has changed and each deployment will use a separate wallet and I suspect it will take them significantly longer to locate and stop all of the instances if the instances don't hit their billing limit before they are found first.

[2019-07-09 00:41:06] <paigeadele> pretty trivial fix if it works

[2019-07-09 00:41:21] <paigeadele> moreover

[2019-07-09 00:46:04] <paigeadele> I changed the script to move everything and all of the work onto the ramdisk, which effectively leaves the customer unable to do any kind of forensic recovery asides from the packages installed in /usr, and pretty much the only people who could theoretically recover anything would be Amazon, HOWEVER, this is implying that your avg on-call for ec2-security knows the procedure for accessing a guests memory using the hypervisor controls in order to get a memory dump to a file. It's not a very common practice except in the context of virtualization debugging. Even so once you have the memory dump this implies that the operator is competent enough to load it up into gdb, go through the stack frames, and knows what they're looking for; for all they know, they could just be looking at a 400GB memory dump of literally nothing out of the ordinary unless their suspicion is to find /dev/shm and what was stored there.

[2019-07-09 00:46:28] <paigeadele> its very unlikely and even so, its just one wallet

[2019-07-09 00:48:08] <paigeadele> also the script disables journaling on the filesystem live which is just crazy I didn't even know you could because who the fuck ever wants to remount their / fs read only for anything without a reboot ? and then mount it back to rw after turning off the journaling xD finishing the install and then mounting it back readonly xD

[2019-07-09 00:48:20] <paigeadele> fucking crazy

[2019-07-09 00:49:41] <paigeadele> something else of interest is all of the guest out of band shit that runs on an ec2 instance

[2019-07-09 00:50:24] <paigeadele> ssm

[2019-07-09 00:50:28] <paigeadele> and cloud-init

[2019-07-09 00:52:00] <paigeadele> ```

16 | 5 | Never give up on your dreams

Friday, July 19th

and I'm like "bruh."

<erratic> APP 10:26 PM
I dont give af if they live with their parents
I mean eventually like no but you know

<neoice> APP 10:27 PM
just like chronic un/under-employment
people without cars, people without the ability to even GO do fun shit cause they're so broke or overworked and broke.
like I know poverty is shit and often difficult to escape

<erratic> APP 10:27 PM
whatever I'll be employed again soon and if I had a partner I could have them take over my cryptojacking enterprise and be a stay at home

<neoice> APP 10:28 PM
haha

<erratic> APP 10:28 PM
will give me more motivation to work harder

<neoice> APP 10:28 PM
stay-at-home waifu haxor

<erratic> APP 10:28 PM
exactly!
now you're speaking my language
speaking of which I need to figure out a way to automate my shit 100%
I don't have anything thats not already well established
actually I setup my router in yast
and it sorta works but its kinda fucky for some reason
but I can autoyast that which I've never tried but miah said she had problems with autoyaster and that it was kind of a pita
I need to finish this https://github.com/paigeadelethompson/netcrave_dyndns
you know I can appreciate that they don't have an oauth api if the reason is because they just wanted to keep shit simple and implementing a proper oauth infra wasn't in the cards for them
this shit is all wrong anyway though and I dont think their node js client is working right
guess I could try this ruby client

<neoice> APP 10:34 PM
ruby all the things

paigeadele 10:35 PM
you sure you wouldn't rather write your whole os in perl bro
ruby reminds me a lot of perl
I fucked with a lot of perl code back in the day I never could commit to like making anything with it though I always just hacked shit together and then when I got to amazon it became a necessity
